

The Weeknd, Try Me

any time is the time
and time for you to give a call, baby
I'm all alone, baby
baby ain't around
pick up your phone, baby

can you try me?
try, try me
once you put your pride aside
you can notify me
you're the best I ever had
baby girl, remind me
mind me
let's me know if it's on
and you know where to find me, find me
having thoughts you never had
I didn't know you were down for finding out
I thought you had some kind of love for your man
will' I'm tryna break up something
you're been working out
you're been steady
but I'm ready to go all the way if you let me
don't you tempt me

you're looking grown since the last time
I looked at you
it might have been
been about a couple months
but I just got the picture that you texted to me
you ain't steady you look already to go all the way
if you let me take you down on me

can you try me?
try, try me
once you put your pride aside
you can notify me
you're the best I ever had
baby girl, remind me
mind me
let's me know if it's on
and you know where to find me, find me
having thoughts you never had
I didn't know you were down for finding out
I thought you had some kind of love for your man
will' I'm tryna break up something
you're been working out
you're been steady
but I'm ready to go all the way if you let me
don't you tempt me

Don't you mess with me /2x
the way I kissed your scars
the way I fixed your heart
Don't you mess with me /2x
