

# There For Tomorrow, Deadlines

I saw just what it does  
When it's too hard for you to face it  
They're still pushing you to make it  
It's been nothing new to me  
Cause it's all been down before  
Four years and we're still counting down  
Until all your precious time is wasted  
It's been no new news to me

We still haven't grown accustomed to the sound  
As they all begin to drown you out  
It's all been done before

When your deadlines become my days and nights  
I'll take all your favorite lines  
When you needed it the most  
As your deadlines end tonight

And you were startled by the fact  
That you could've had it better off by now  
Its not over until the quiet are calmed down  
Oh, yes  
Maybe its too plain to stand on solid ground  
It got old but you can't blame it all on me

We still haven't grown accustomed to the sound  
As they all begin to drown you out  
It's all been done before

When your deadlines become my days and nights  
I'll take all your favorite lines  
When you needed it the most  
As your deadlines end tonight

I saw just what it does  
When it's too hard for you to face it  
They're still pushing you to make it  
It's been nothing new to me  
It's all been done before

When your deadlines become my days and nights  
I'll take all your favorite lines  
When you needed it the most  
As your deadlines end tonight

Please don't give up when your deadlines become my days and nights  
I'll take all your favorite lines  
When you needed it the most  
As your deadlines end tonight.
