

Thirteen Senses, Animal

I lost my control today
Something came and ate it away
Tears trickle down your face
As quickly as it comes it escapes

Now you
You'll never get this far off the ground
Throw in all designs when you're found
You'll never get that far from me now
And damages take one more look around

Science made us skin and bones
Turn us into earth and stones
Time it takes to fade away
Is time enough to find a place

Now you
You'll never get this far off the ground
Throw in all designs when you're found
You'll never get that far from me now
And damages take one more look around

And I
I can't decide
If I'm
Prepared to fight

Your eyes
They come alive
At night
So you can fight

Like an animal
Like an animal

Like an animal
Like an animal
