

# Thousand Foot Krutch, Everyone Like Me

I've got a lot going on inside  
Don't know if I can work things out this time  
Need a little space to clear my mind  
But I'll be fine

Don't slip, it's not always this cold  
I'm tired of acting like I know  
Am I searching for the answers  
No one knows

And I must confess  
Before I take another step  
That

This song's for everyone like me  
Everyone not afraid to stand alone  
And lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down

Wait  
It might not be too late  
To avoid the tension we create  
How about I turn and walk away?  
No matter what you say

Its not a combination  
I've tried to figure you out  
I'm looking for the confirmation  
So I can turn this around

And I must confess  
Before I take another step  
That

This song's for everyone like me  
Everyone not afraid to stand alone  
And lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down

Every time I turn around  
You're looking for attention  
You've taken all the things I've said and  
Throw them away  
Drank them away  
Every time you show up late  
You're looking for forgiveness

I must confess  
Before I take another step  
That

This song's for anyone whoever took a chance,  
Who started at the bottom to get to the top,  
And no matter what you face in this life,  
You gotta know what you're up against,  
In order to fight back

This song's for everyone like me

Everyone not afraid to stand alone  
And lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down

This song's for everyone like me  
Everyone not afraid to stand alone  
And lonely  
And lonely
