

Throw Me The Statue, Lolita

Lolita, I gotta see ya
I got a fire when she pulls me in
Those young girls love automatic
I want to make you lose your brain
For all I know

Come on over and she's pulling at my shirt
Like she's telling me to stay
Well, take a look over here
C'mon, I got the bullets in my head
And she asks me why I care

Shakin' off the dusty cape
Lacin' it up again
Cause she used to love it
So I bury my shame
She was nineteen and we all rearrange

We could do it all and it'd all go faster
Things could multiply at appalling rates
Then we'd lose our heads
And we'd still go faster
Even on our birthdays

Every night I pray
She comes around my house to stay
And every night I pray
She comes around my house to stay

The hunger has not receded
Those little moments when it wraps my head
The feeblest offers are taking it off
Cause with all my heart in with blood

Shakin' off the dusty cape
Loosen it up again
Cause she used to love it
So I bury my shame
She was nineteen and we all rearrange

Alright, we could it all and it'd all go faster
Things could multiply at appalling rates
Then we'd lose our heads
And we'd still go faster
Even on our birthdays

Every night I pray
She comes around my house to stay
And every night I pray
She comes around my house to stay
