Tidfall, Mercury Mesh

We are the neurotic illness.
Domination whip of extacy death.
Cruel crossbred mutating creature
Fear generator bred to burst

We flay off our flesh and throw it away,
The mercury mesh shines brighter today.
Infectious inside and nothing more
I know, I've been there, I'm contagious for you
Forevermore.

Heretic electropulse countless times
Means meaningful things all the time.
Meaningful things all the time
Become meaningless pulses countless times.

Pulses of extacy whipping your spine
The generator burst, transmit fear to your mind

We flay off our flesh and throw it away,
The mercury mesh shines brighter today.
Infectious inside and nothing more
I know, I've been there, I'm contagious for you
Forevermore.

The turbine world
The meaningless world / with the meaningless pulse
Would you like to commence the unavoidable end
The generator burst, The spread of infection,
The mercury mesh ignition. Go!

We flay off our flesh and throw it away,
The mercury mesh shines brighter today.
Infectious inside and nothing more
I know, I've been there, I'm contagious for you
Forevermore.
