

Tinfed, Always/Never

If you make a plan
I want to be there
And if I'm pissed off
I would leave
I never could distinguish
If you would too
I'll be there to ash your cigareete
And If you want me to
I'll comb your head
Times like these I could live forever

Back up in a corner
Go ahead and spring
You make the best impression I've ever seen
You somehow make sadness seem new
Jaded by everything in sight
Everythign I do is becoming trite
And if you came around I just might never...

Could you be the one to make it right?

From the kcik off it's plain to see
Set to lure than endure
It makes me somewhat cautious
When it gets too good to be true
I'll be there to ask your cigareete
And when your body wants to lose it's head
Don't you think that you can live forever?

Always and Never you are always and never the same

Back up in a corner
Go ahead and spring
You make the best impression I've ever seen
You somehow make sadness seem new
