

# Tobymac, I'm For You

Tell me where its hurting  
Are you burning?  
Running just to catch your breath  
And going nowhere  
It's getting old when you feel like you got nothing left  
Well it ain't over 'til its over  
I told you since the day we met  
So let me be the voice through all the noise  
Whatever I gotta be  
I'll be for you

Whatever you need from me  
To see you through  
Everyone of us has stumbled  
Everybody's humbled  
We hit the ground and our lives crumble

Whatever I gotta be  
I'll be for you  
I'm for you  
If you never knew  
If you never knew  
I'm for you  
You know its true

I know the feeling  
I know its real when the drama's all in your face  
You see a mountain  
I hear a promise its never more than we can take  
Well it ain't over, 'til it's over  
We can learn from our mistakes  
So let me be the voice through all the noise

Everyone of us will fall  
Have our backs against the wall  
And everyone shares a need to be loved  
Youve always been for me  
So I will be for you  
That's just what it means to love
