

Tocotronic, Let There Be Rock (English)

So we pulled over
In the most boring landscape on earth
We talked among ourselves
Before too long it was clear
That we like it here

The human exploitation
Takes on a new quality
And everywhere you hear
The art of garden-design
Is still cultivated here

I can here you say
More softly than loud
It is the youth themselves
Who have built it all up so well

Let there be rock (3x)

And all the things we've hated
Since the very first day
Will never leave us alone
Because actually we like it anyway

I can hear you say...

Let there be rock (3x)

Let there be rock (7x)

Just one more hour
Just one more day
Let there be rock
God damn it all

Let there be rock (2x)
