

Tom Cochrane, When Im With You

Come sit by the fireside
With me baby
Melt into the dawn
With me girl

Let yourself flow
Like a river to the sea
Together we'll grow
Just like a willow tree
You're much older than the others
In just so many ways
And when you love me girl
You leave me in a daze

When I'm with you I'm truly stoned
It's you, me and the firelight shadows, alone
Baby it's love, baby it's home

The way you shine
In the morning light
Makes everything alright
The way you move me
Is out of sight now girl
You stand by the fire
All bathed in gold
With your hair flowing down
Upon your silken robe
And you move to the window
And you stare down below
Out onto the darkness
And the shadows in the snow

And when I'm with you I'm truly stoned
It's you me and the firelight shadows, alone
Baby it's love, baby it's home

We don't need-----grass
