

# Toploader, Do You Know What Your Future Will Be

when you look to the past  
you won't miss what your missing  
Thank the heavens, those days are gone

Keep good faith on the shelf  
Use it when your not well  
All the mistakes you've made  
don't matter now

Do you know what your future will be  
Do you know what your future will be

Don't wear your heart on your sleeve  
too many lives to retrieve  
Mother nature will help you if you let her

Keep back a bit for yourself  
Keep it with faith on the shelf  
Safe under your wing its just a silly thing

Do you know what your future will be  
Do you know what your future will be

Get up, Get down  
Running round the town  
Round and round in your head  
You've gotta rest your sleepy head

So when you look to the past  
You won't miss what your missing  
Thank the heavens above  
those days are gone

Do you know what your future will be  
Do you know what your future will be

Repeat and fade
