

Toploader, Stepping stones

Stepping stones, I know that's all I am to you
One more step and then your gone
How I try and try and try
All these things go rushing by
Then you'll come and let me down
Jetting of to far off places that we knew as a child
Walking through a sea of faces lasts for a while
Make your way far up stream
I'll meet you in a sunken dream
Then you'll come and rescue me
Jetting of to far off places that we knew as a child
Walking through a sea of faces lasts for a while
And I know you want it change
But this feeling it remains
Your just not like us, no no stepping stone
