

# Tori Amos, A Silent Night With You

The radio plays my holiday faves  
It takes me back to when our love was new  
Young lovers pass me by with their glow  
That used to be us not so long ago  
You said then  
"I just want to spend a silent night with you"  
With you  
A silent night with you

Joy to the world, your arms kept me warm  
Night after night, in such a cold world  
Hear the bell strike, old pictures instead  
Tell me the past is filling my head  
You said then  
"I just want to spend a silent night with you"  
With you  
A silent night with you

The radio plays my holiday faves  
It takes me back to when our love was new  
Lost in my daze, you slip past and say  
"Girl, take my hand, see, nothing has changed  
Now or then  
I just want to spend a silent night with you"  
With you  
A silent night with you  
All is calm  
All is bright.
