

Tosteer, Far away from you

Crossing the borderline
Slowly to the other side
Breaking through the fear in me
Deeper every time
Nothing left behind
Sticking in the place I shouldn't stay
Burning down my heart
Leaving what I couldn't start
Crawling to another fake
Drifting from the sun
Hiding out of sight
Feeling like there is no other
left to blame
Trying to stir your soul
But I've never said a word
My thoughts always stray
Never want to leave
And never want to stay
Far away
Melting in your light
Couldn't make things right
Nowhere else I could turn
Breaking through the night
Took tears for a ride
Will it be the same if I don't care
Who's to save my soul?
Find a way out from my world
Take me by the hand
Never want to leave
And never want to stay
Far away
