

Tower Of Power, Unconditional Love

I used to be a part of lover
Just drop in everyone since a while
I had to do with undercover yes I did
That was just my style
Now I have the strangest feeling
This love thats really got me really
Everything we do is together
This love I have for you is forever ooh
Chorus:
Unconditional love, unconditional
That is what I have for you
Heres my position of love, unconditional
Love is what I have for you
Never care about tomorrow
I only thought about what I could get today
I left behind a tread of sorrow hm
That was just my way
Still it didnt even come close
To feel in up that all and my soul
Now I had a change apart
Girl I hope that we will never apart
Chorus
You love me I love you
And thats the way its falls to be
Together forever from now to eternity
Chorus Fade out
