

# Traffic, Many A Mile To Freedom

Sometimes I feel like I'm fading away  
You're looking at me, I've got nothing to say  
Don't make me angry with the games that you play  
Either light up or leave me alone  
You walk in my room, you lie in my bed  
You open your mouth, shoot someone dead  
All of a sudden you're inside my head  
Either light up or leave me alone  
Spending my bread like it grew on a tree  
You're trying to tell me 'bout the birds and the bees  
The skirt that you're wearing is way past your knees  
Either light up or leave me alone  
You're up all night preaching your mind  
Come home in the morning with your latest find  
I'm gonna have to lay it to you straight on the line  
Either light up or leave me alone
