

# Transmatic, Impossible

It's not your fault and no one's right  
It's a shame, don't ever change.  
It's impossible, I know.

Life is short enough  
Are you feeling lonely?  
Cause you just wanna spend your time  
With someone that can read your mind.

And there're no postcards  
When you're floating out this far  
And for the last time...I wanna feel something.

What you say and what you mean  
Are different things...like a wave on the ocean.

(CHORUS)

Wash away the old divide.. it's impossible...I know  
And some things you can't revive  
Don't know where to go...only need to feel something

Where would you be now if I didn't try to break you out?  
It'd be the same page... in the same cage.  
Remember all that fear? Why'd you ever bring me here  
If you were gonna change?  
I would've stayed away.

What you say and what you mean  
Are different things...like a wave on the ocean.

CHORUS

Give me one more night...so I can show you I  
Swear I know what you're thinking.  
I just wish I knew what you were thinking

Don't know where to go  
Only need to feel something.
