

# Travis Tritt, When I Touch You

This ol' world, can lay so heavy, on my shoulders  
And this face, in my mirror, keeps getting older  
But no matter how much pressures on  
I can lay it down, when I get home  
Cause it all just fades a way, when I touch you

Chorus:

It's the kind of love, that lingers through the ages  
A firm foundation built, to see us through  
So let the storms of life, go right on ragin'  
For there's calm inside my heart, when I touch you

Years from now, when my life, is nearly over  
And there's nothing more this world, needs me to do  
If my feeble hand's still strong enough, to reach out  
I can leave a happy man, when I touch you

Repeat Chorus:

Yes it makes everything alright  
When I touch you
