

Treble Charger, Don't Believe It All

Halfway from midnight to dawn
Let's just forget and move on
Everything you say
It never seems to change a thing in sight
And things you never did
Were even worse considering what's right

That all this time I've
Been the one you string along
Tie me up to bring along
Never once getting in your way

What you say is unbelievable
I can't stand to hear it once more
What you did, I don't believe at all
And what's worse, you can't even say why

Half of my life flashes by
Just looks me straight in the eye
Words are kind of cheap
The company you keep is more to blame
The things you always did
They never seemed to me to be as tame

All this time I
Tried to leave but never could
Wonder if I ever would
Knowing you'd be standing in my way, so

What you say is unbelievable
I can't stand to hear it once more
What you did, I don't believe at all
And what's worse you can't even say why
You can't even say why
You can't even say

Like it was ten years ago
What's forgotten down below
Some things that you'll never know

What you say, I can't believe
I want to know what's right (x3)

What you say is unbelievable
I can't stand to hear it once more
What you did, I don't believe at all
And what's worse you can't even say why (x2)

What you say, I can't believe
I want to know what's right (x2)
