

Tribbs, All night (feat. C-bool, Scott Mac)

There's nobody like you in my life
You just wanna move right through the night
Even when you're gone can get it right
I'm losing my mind

As long as you're coming with me
There's no place better to be
Just take my hand, let's go alike
And when we get to the morning
I might even lose you
But tonight I'll be just fine

I just wanna go where the music's loud
And dance all night
We dance all night
Can we get it back when we were louder
And we dance all night
We dance all night like it was before

There's nobody like you in my life
No one else can make me fell alive
If I get lost into the night
I'll be allright

As long as you're coming with me
There's no place better to be
Just take my hand, let's go alike
And when we get to the morning
I might even lose you
But tonight I'll be just fine

I just wanna go where the music's loud
And dance all night
We dance all night
Can we get it back when we were louder
And we dance all night
We dance all night like it was before

I just wanna go where the music's loud
And dance all night
We dance all night
Can we get it back when we were louder
And we dance all night
We dance all night like it was before
