

Tripside, Energy

I looked up at the sky today.
Wishing it was you that I saw amidst the clouds.
Feeling stranger than I did before.
Blinded air I can breathe no more.

A million lies and broken dreams.
Love is just not what it seems.
So come down from that broken sky.
I said I loved you but don't ask me why.

So be my energy.
Flow right through me once again.

Is it something in the air?
Cause everything is just so right.
But for some strange reason you don't care.
Cause everything to you seems so wrong.

So be my energy.
Flow right through me once again.

Is it something in the air?
Cause everything is just so right.
But for some strange reason you don't care.
But everything is just so right...
