

Trish Thuy Trang, I Love You Baby

When I'm cold and lonesome inside
Underneath the heavenly sky
I wish upon a star, no matter where you are
However near or far, just to see you tonight
All alone, with nowhere to hide
Up above the world oh so high
I hope and pray someday although you're far away
That you will feel the same as I do each and every night

Chorus

I love you baby, I know I always will
As long as I live, I will be here for you
And someday maybe, you'll say you love me, too
The way I love you, there's nothing I won't do

There's no words to ever describe
What I feel I cannot disguise
But you will never know how much I love you so
And I will always hold you so dear till the end of time

Chorus

Above the world oh so high
You sparkle and shine
Alone with nowhere to hide
Oh heavenly sky

Chorus 3x
