## Trisha Yearwood, Love Alone

It's been a long road, but we got here It wasn't easy, but it was true We found out through all the bad times It all comes down to me and you

We held the greatest expectations Only to find it was not to be All the dreams we left behind us Only serve to set us free

[Chorus:]
We don't need no bag of silver
We don't need no fields of gold
Don't it make you high
Make you want to fly
Knowing we can live on love alone?

We made our break straight out of high school You went your way and I went mine Everything that we went looking for Was here inside uss all the time

[Repeat chorus]

[Bridge:]
We have shared every tear
Through the years
For all the laughter and the pain
One thing remains

[Repeat chorus]
