

Tristan Prettyman, For You

You wanna play the song that breaks my heart
you want her to hear the words that tear me apart
how did you do this to me?
you know you got me right where I'd want you to be

The hard to get make you wait game seems to work
though in the end I know I'll only end up hurt
I'd probably be here if she would have left
and I bet, forever you would have kept me but

if it wasn't for you, i'd have nothing to say
and if it wasn't for reason, I could make this all go away
and if it wasn't for you I might never have tried
and if it wasn't for you and her I may have never realized

Let the months pass, let the hurt start to feel
I've come to my senses, this is f**ked up but its real
you'll break her heart just like you did mine
your love is weak, its only a matter of time...

if it wasn't for you, i'd have nothing to say
and if it wasn't for reason, I could make this all go away
and if it wasn't for you I might never have tried
and if it wasn't for you and her I may have never realized
