

Tristan Prettyman, Something In The Way

there's always something in the way
telling me that I should stay
there's always something new your holding on too
and I just cant seem to see it through

cause when you opened my eyes to
a little bit of perfection
I must have forgot to mention
that your the love of my life
something about this isn't right

there's always something in my head
the words that stick before I go to bed
I find them now
but later I cant get them out
so I just smile instead

so when you opened me up to
a little bit of perfection
I'm sure I forgot to mention
that your the love of my life
something about this can't be right

did you ever wonder where you'd be
if you weren't here now
and have you ever watched someone's eyes light up
by the words come out of your mouth
have you ever seen a sunset while your driving south
well I do, I see it all so clearly now

cause it opened my eyes up to another direction
I think I forgot to mention, that this is me living my life
and for once it all feels right
