## Triumph, Take My Heart

Take my heart I lay it out before you in my song I play my part And hope against all hope You play along Take my heart Take this magic from my mind Take my heart Take the dreams you always Hoped to find

CHORUS: Take my song, take my heart Give my dreams a chance to start Take my song, take my heart Take my love

I wear a song to mask my awkward face The music helps to fill the empty space I wish that I could hide it all away Instead it shows in every note I play And I play And I play

CHORUS
