

# Turbonegro, Blow Me

You think I'm fat  
But its an optical illusion  
You know I'm hot  
It's just my chemical solution

So when you hear my mighty call  
You better  
Hoist your sails and pray for the gods of wind  
To blow us all

So blow me  
Blow me like the wind  
Blow me  
Blow me once again

Tonight I'm feeling tops  
On the stairs of evolution  
I call the shots  
In my genetic revolution

Cause I've been waiting  
Waiting night and day  
Just something good might blow  
Might blow my way

So blow me  
Blow me like the wind  
Blow me  
Blow me once again

If I gave you a turn on  
Would you raise my antenna  
If i gave you a dime  
Would you blow my paradigm  
If I gave you my candle  
Would it be too hot to handle  
If I ran for election  
Would you support my erection

So blow me  
Blow me like the wind  
Blow me  
Blow me once again
