

# Turbonegro, Dark Sercret Girl

I look her up  
And you hold her at bay -  
I try to hurt  
But it went away -  
You went away  
To start a real loud -  
Then I wanted  
To lose this crowd -

You and me - Together in the darkness  
You and me - Together in the darkness  
It takes two - To understand  
It takes two - holding hands

I woke up  
It was late at night -  
Transcend that sudden moon  
Then I know  
I was alone on earth -  
You know I paid  
For in this dirt -

You and me - Together in the darkness - 4x

It's only you - Together in the darkness  
It's only me - Together in the darkness  
You and me - Together in the darkness  
It's you and me - Together in the darkness

So eat shit and die  
Eat shit and die

You and me - Together in the darkness  
Only you - Together in the darkness  
Only me - Together in the darkness  
I want you - In the darkness  
It's over you  
What's over me

Goddamn me -
