

Turdus Musicus, Anymore

Take me somewhere fast
I'm afraid what we hold won't last
I will fail terribly
Go ahead get outta here

I don't really know why we come here
anymore

You should have known
But I don't want to be left alone
Will you really be gone
Or would you stick around to watch
me come clean

I don't really know why we come here
anymore
I don't really know why we come here
anymore

You're on your own
I'm here with you but you're all alone
yeah you're on your own

Make me tell you why
just make me

I don't really know why we come here
anymore
You're on your own
I'm here with you but you're all alone
yeah you're on your own

Make me tell you why
just make me
