

Turin Brakes, Future Boy

So future boy where are you from my time machine crashed over yonder
Syphillis is a bitch but contracting HIV is much worse.
Why are you pushing info into me,
I have no need for it, Im from the stars.
I thought youd like to know the scoop
Im taking babies back with me, yeah.
Im taking them back home
so they can see theres a much better place.
Ive got a sister with an open mind and my friends are all junkies
But there still my friends, as long as they dont use monkeys,
We enjoy the heat of stolen days in the summer of 93.
Well the future boy said Ive got friends but you know sometimes
it all depends on how tall they are against yourself.
I am the future boy
My friends have all gone and left me
so I decided to come here and see myself as a baby,
but it looks like Im stuck here this time, oh shit,
Im gonna miss my friends.
No your still the future boy,
Yes Im still the future boy
Well build you a time machine to get back home.
Still the future boy..
Well Im still the future boy
