

Tuuli, It's Over

You never told me from the first time
I had to beg you not to leave
You never seemed to care the first time
Now is the last time you are walking out on me

You've done enough for me to hate you
Expecting me to forgive you
I don't believe you'll change
I don't know where i went wrong
You only want me when I'm gone
You're not that smart, you're not so strong

You only want me when I'm....
Gone,
It's over, all over, so over
You'll never know
What does it take to make you believe
How did we ever start?
You deserve a broken heart
Cry me a river we're so through

People Change and I forget you
The light dims and still you
Like a ghost that i can't shake
I feel so stupid when I look back
All the things that you lack
Reflected onto me

I don't know where i went wrong
You only want me when i'm gone
You're not that smart your not so strong
You only want me when I'm...
Gone
It's over, all over, so over
You'll never know
What does it take to make you believe
How did we ever start?
I don't deserve this broken heart
Cry me a river we're so through

You never told me from the first time (You said you were my friend)
I had to beg you not to leave (I thought you were my friend)
You never seemed to care the first time (You never were my friend)
Now is the last time you are walking out on me

It's over, all over, so over
You'll never know
What does it take to make you believe
How did we ever start?
I don't deserve my broken heart
Cry me a river we're so through
Cry me a river we're so through
Cry me a river we're so through
I cried and now I'm over you
