

Tuuli, Thousand Stars

In your head it makes sense
Now I have dropped my defense
I hope you figure it out soon
I can't comprehend
The mess we're in this time

Better off without me?
My gut have never failed me
I'm struggling to see your view
I'm done with this game
It always ends the same

I hope you're feeling fine
I know it hurts to cry
It only hurts cos I belong beside you
You think about the times
The stars just won't align
It never works cos I belong beside you

Breathing without thinking
I wis you would stop talking
I just don't wanna listen to you
I can't comprehend
The mess we're in this time

Waiting for a sure sign
To help me make up my mind
I hope I figure it out soon
It's raining again, a thousand stars align

I hope you're feeling fine
I know it hurts to cry
It only hurts cos I belong beside you
You think about the times
The stars just won't align
It never works cos I belong beside you

And I would die beside you
