

# Tweak, Sunny Days

Scars way too deep to see  
Stacked bottles all empty  
We've no more blood to bleed  
But no crying  
We're too old for tears

I dedicate this to my friends  
Who've made it through these years  
Another crazy story ends  
Far gone, but they're with us forever

Sunny days, stay with us forever  
Sunny days, we'll sleep 'till November  
Sunny days, stay with us forever please

Looks like we all survived  
This chaos, it made us  
Lucky to be alive  
We made it  
Half wasted out

Sometimes I feel I can't go on  
They're pushing me too hard  
But then I'll look back on all those days  
Far gone, but they're with us forever

Please take me back to those summer days  
Please take me back to those sunny summer days
