

TWICE, SCIENTIST

Why do you keep studying me?
You are no Einstein
Why do you measure angels?
This is no sine or cosine
Pushing and pulling
That's not quite my style
If you're gonna give up in the middle
You'd better stay away from my heart

You think too much
That's your problem
Being stuck in your head
Will do no good
Quit wasting time measuring angels
Finding answers
Better make a move

Love ain't a science
Don't need no licence
The more you sit there thinking
It's a minus
Don't try to be a genius
Why so serious?
Follow your heart
Let your heart lead you
What you
What you waiting for?
