

# Twoface, You

The rain pours down from one black cloud  
I see the moon right at the edge  
A bloody sun speaks at noon  
I can't find the trace up in my head

When I say you  
I do mean you

Let's run away  
I know this island  
Where everybody sings for you  
Let's join the party  
Keep it going  
If you get my point of view

Sure, I have been crying in my dreams  
And if a sleeping tear should wake be here  
I wanna know when the big black cloud has left  
I wanna hear your whispers in my ear

When I say you  
I do mean you

Let's run away  
I know this island  
Where everybody sings for you  
Let's join the party  
Keep it going  
If you get my point of view
