

# U2, The Blackout

Got a star  
wonders why it's still off the Earth  
a meteor promises it's not gonna hurt

earthquake, always happen when you're in bed , Fred  
The house shakes  
maybe was it something I said, Ned

go easy on me  
easy on me lover  
go easy on me  
easy on me now

When the lights go out  
it's all you talk about  
In the darkness where we learn to see  
when the lights go down  
don't you ever doubt  
the light that we can really be

statues fall  
democracy  
is flat on its back, Jack  
We had it all  
and what we had is not coming back, Zack  
A big mouth says the people  
they don't wanna be free  
for free

the blackout is this an extinction  
even we see

go easy on me  
easy on me lover  
go easy on me  
easy on me now

When the lights go out  
it's all you talk about  
In the darkness where we learn to see  
when the lights go down  
don't you ever doubt  
the light that we can really be

When the lights go out /5x

blackout it's clear  
who you are will appear  
blackout  
no fear  
so glad that we are all still here  
When the lights go out /3x

When the lights go out  
it's all you talk about  
In the darkness where we learn to see  
when the lights go down  
don't you ever doubt  
the light that we can really be
