

Ultimate Fakebook, Of Course We Will

Pull the covers up
Turn out the lights
Believe me
It'll be alright
I know you had it in your sights
But still you can't stay up all night
Let down
You're spun around
You just can't think about that now
Cause it's never quite like the plans your head dreams up
and I'm telling you, know that...

We could dream all night here baby
about our time in the sun
It takes a lot to get things done
But of course we will
And we can't spend our time on something that might not ever come
So just sit back cause this I know
Of course we will

So you've tried to hold it in
But still it doesn't help when they say
"Hey get up! Sit down again!"
I guess that's how it goes and
There's no sound
You're spun around
You just can't let it get you down
Cause that movie that's called "Life Sucks" stars everyone
and you're a big part, girl

We could dream all night here baby
about our time in the sun
It takes a lot to get things done
But of course we will
And we can't spend our time on something that might not ever come
So just sit back cause this I know
Of course we will
