

Ultrabeat, Feel It With Me

I lay here by your side
the moon and stars are out tonight
And in the distance music starts to play

You wake up from your sleep
I take your hand to the hope to be
And in the chance the sound takes you away

Come here beside me
A little closer
Don't run away from the passion that you know

Come here beside me
A little closer yeah
Feel it with me

Day by day
I said hour by hour
You make it a little closer

Day by day
I said hour by hour
I make you feel it with me

I lay here by your side
the moon and stars are out tonight
And in the distance music starts to play

You wake up from your sleep
I take your hand to the hope to be
And in the chance the sound takes you away

Come here beside me
A little closer
Don't run away from the passion that you know

Come here beside me
A little closer yeah
Feel it with me

Day by day
I said hour by hour
You make it a little closer

Day by day
I said hour by hour
I make you feel it with me
