

Uncle Outrage, The Chemical Man

Detroit and me will never break the scene.
No big machine will ever protect me.
'Cause I never knew how to work it.
You can't find love in gears and circuits.
So go ahead and try to get even,
But f**k you lab,
I'm leaving!

Take it all, I hate it all.
My life is so shitty.
Maybe some more chemicals would make me feel happy!

'Cause I never knew how to work it.
You can't find love in gears and circuits.
I gave you a second chance,
But your metal heart is cold.
