

Undead, When The Evening Comes

(Steele)

Sitting here all morning
Trying to get in touch with you
All day long
Wondering what I'm gonna do
You know I want you baby
You know I love you and it's true
And when the evening comes
This is what I'll say to you
Sitting here all morning
Trying to ask you for a date
All day long
Honey and I just can't wait
You know I want you honey
I can't let you outa my sight
And when the evening comes
Everything'll be alright
And when the evening comes
Everything'll be alright
And when the evening comes
Everything'll be alright
You got me going crazy
'Cause you're nowhere to be found
I got a pain in my heart
And it's really bringing me down
Sitting here all morning
Trying to get in touch with you
All day long
Wondering what I'm gonna do
You know I want you baby
You know I love you and it's true
And when the evening comes
This is what I'll say to you
Sitting here all morning
Trying to ask you for a date
All day long
Home again, I just can't wait
You know I want you honey
I can't let you outa my sight
And when the evening comes
Everything'll be alright
And when the evening comes
Everything'll be alright
And when the evening comes
Everything'll be alright
And when the evening comes
Everything'll be alright
