

Undercover (US), The Moon And The Blue Around

Treat her nice
Treat her to ideas you designed
She's been hurt before
I would gladly take her
To the summer in my arms
I would gladly take her if I could

The moon and the blue around
We can find and play
After we have looked down
Moment seized, now silent, past

Speak to her, speak to her
In kindest terms listen to her
She's heard lions roar
Let me listen slowly
To ideas she designed
Let me listen slowly to her eyes

The moon and the blue around
We can find and play
After we have looked down
Moment seized, now silent, past

Take good care, take good care
Of my beloved's time
Innocence becomes her anyway
I would gladly keep her
Through the winter if I could
Listen slowly to her lovely eyes

The moon and the blue around
We can find and play
After we have looked down
Moment seized, now silent, past
