

# Undercroft, Through The Night's Veil

Through the night's veil  
Exploiting my eyes  
Behind the endless sky  
It beholds a secret  
My dream, my steps alone  
Charm me in silence  
Ill me with mystery  
Call me from your womb  
Are sweet caresses  
Are smooth groans  
Hidden in the shadows  
Through the night's veil  
Have no words on my lips  
Cold and pain: no exist  
Pureza maligna llega  
Detras del cielo oscuro  
Left... guided by fear  
Oh !!! my steps !  
Unknown reason  
Through the night's veil  
Are sweet caresses  
Are smooth groans  
Hidden in the shadows  
Through the night's veil
