

Union, Empty Soul

The open road is callin'
I'm headed for the setting sun
I couldn't help but thinking
What the world is running from

Seems everybody's running
Everybody's hoping they're gonna get it right
'Cause everybody wants it (but)
Everybody's holding on just a little to tight

So we gotta try
Looking inside... It's been a long time
You gotta try
And ask yourself why
But take it easy it's all right

Cause the things that you want
You gotta leave them behind
Cause you've already got
What you're trying to find

They hours they been passin'
I pulled off for a bite to eat
And when the waitress asked me
"Hey man, what'll it be"

I said "Everybody's hungry"
Everybody's trying to fill an empty soul
And even though they know it
Everybody's holding on when they oughta let go

So we gotta try
Looking inside... It's been a long time
You gotta try
And ask yourself why
But take it easy it's all right

Cause the things that you want
You gotta leave them behind
Cause you've already got
What you're trying to find
