

# Unleash The Archers, Test Your Metal

Test your metal!

You been around town with an original sound and everyone knows who you are  
All you really got is your name, but everybody loves you the same  
The party don't start till you walk in the bar, and the crowd is waiting on you  
As soon as they hit the lights, take flight  
But there's not many places you can play and all the faces stay the same  
I'm not tryin' to say this town is lame but it's time...

Test your metal!

Hot city nights, under city lights; we are the night

Trust me when I say to hit the road and escape, can you hear them calling for you  
Just try to take it day by day, the next town ain't so far away  
There's a world outside lets take a ride, I'm not gonna say it again  
Now's the only chance you got to rock  
Don't let your dreams get away, get up, go forth and make them scream... It's time

Test your metal!

Hot city nights, under city lights; we are the night

Test your metal!

Hot city nights, under city lights; we are the night
