

Urban Dub, First Of Summer

Parked car
This night sky
Makes city lights shine like diamonds
our song plays on the radio.

We're living it up
Make this night ours
We own the world
I wish this lasts forever
Alone with you tonight
Further in you feels so right.

I'm giving it up and just a little more

This heartfelt leap I surrender
With arms raised tonight.

Drive me away
'cause the night just feels right
take me away with you tonight
anywhere with you.

Our song plays on
Parked car, night sky
Alone with you tonight
