

Urban Mystic, Long Ways

[Verse 1]

Funny how you wake up
Say you wanna break up
You say times out my Jacob
You've been watching and observing
And don't know where we're going
You ain't got time for blowing
It's apparent here lately
You've been acting shady
An with everything you're doing
You ain't trying to involve me
We really need to stop it
We came a long damn way

[Chorus]

We done came a long way
We done came a long way
We done came a long way
We done came a long way

[Verse 2]

Maybe I should tighten up
Or maybe I should lighten up
And show you that I got your back
Even though sometimes I act like
I don't hear what you're saying now
Maybe I should stop playing round
Show you that i'm a real man
And hopefully you'll understand
That I ain't going nowhere
Ain't no need to take it there
So won't you put them bags away
Cuz we done came a long way

[Hook]

Sometimes it gets rough
And you go through some things
Sometimes it seems like too much
Girl, but we got to stop and think
One day I hope you wear my wedding ring
Cuz only you know where we've been
And you know we've come too far, yeah
Cuz you were there when I
Was set down in the ghetto
Yeah, baby we've come too far to turn around now

[Chorus]

We done came a long way
We done came a long way
We done came a long way
We done came a long way
