

Uriah Heep, Golden Light

They told me that the world was complicated
No answers to the questions in my head
Well I said no more uneasy conversations
I don't wanna be the prize that you found
Just let me be myself and keep my feet on the ground

There's a golden light shining down on me
On an open road somewhere
There's an angel guide showing me the way
Helping me survive

The everchanging words that we are given
All sit somewhere between a truth and a lie
But truth will lead us to that sacred rainbow
A shift of mind is all that you are
A different way of seeing way beyond the stars

There's a golden light shining down on me
On an open road somewhere
There's an angel guide showing me the way
Helping me survive

Don't wanna be the prize that you found
Just let me be myself and keep my feet on the ground

There's a golden light shining down on me
On an open road somewhere
There's an angel guide showing me the way
Helping me survive
