

Urma, Only Human

It's coming...it's my time to let you hide
Can't keep you trapped inside
It's here now...it's the point of no return
Chasing ghosts...memories...alone

Time would not buy me
Tome cannot heal
Not a chance.

When I awake...I caught sides of my dreams closing doors
So the can keep me and you without need of control
In this silent controversy...

Reflections...colored future in my glass
Blending shadows with my past
It's done now...deal the cards...I'll let you play
Lack of words...describes the day

Time would not buy me
Tome cannot heal
Not a chance

When I awake...I caught sides of my dreams closing doors
So the can keep me and you without need of control
In this silent controversy...

Human...we're only human...just human
No angels falling in my bed at night.
