

Utopia, Rock Love

I seen these big shots all come and go
Been there myself and there's one thing I know
You got to choose your heroes, choose them well
They could be leading you straight into hell
Let me be your protection
Keep the vampires off your neck
Sample your wine and
Stay so near that you'll never have a thing to fear
Get thee behind me Satan
Big as a mountain, strong as a diamond
Rock love
Bright as a nova burning forever
Rock love
Close as a heart beat, free as the water
Rock love
Get thee behind me Satan
I see the same damn faces in the news
Taking up sides when there ain't nothing to choose
I think their game is just designed to confuse
They cut the pie up and the rest of us lose
Let me be your advisor
Keep the monkeys off your back
Figure your taxes
Stay up all night making sure that everything is right
Get thee behind me Satan
It seems like only yesterday
Remember when I used to say
I knew we'd be in vogue someday
Rock love is love and not fade away
Lord you got to rock on
Got to rock steady
Spinning on the rock of love
Can you feel it
Hard as a rock, strong as a rock
Put your hands on the rock
You've got the rockin' steady now
I looking for a life like the rock
