

# Van Canto, Speed Of Light

At the speed of light  
At the speed of light

I have walked about a million miles  
Step by step into the haze  
To notice it it took a while  
That circles were the ways I made  
Is it far too late?  
Changing my own fate  
A million voices telling me  
"Tomorrow is a different day  
Our concept is to do the same  
The opposite of yesterday"  
Let me get away

At the speed of light I fly  
I'm one step away  
Seconds turn days into nights  
And I'm on my way  
At the speed of light I fly  
Aeons passing by  
All believers still alive  
At speed of light they fly

A cave - narrow walls surrounding me  
This is just a place to die  
Although sometimes one gets to see  
Brighter lightening passing by  
At the speed of light  
Breaking through the night  
A million voices telling me  
Nonsense I should listen to  
There's better life beyond these walls  
And now I know what to do  
I will get away

End what was there, what has been  
Break the silence  
Tell me about what you hold inside  
See what is here, what will be  
Be inspired  
Take off to fly to a better life

At the speed of light I fly  
I'm one step away  
Seconds turn days into nights  
And I'm on my way  
At the speed of light I fly  
Aeons passing by  
All believers still alive  
At speed of light they fly

Flying at the speed of light  
The speed of life is quickly passing by  
Still it's all the same  
Flying at the speed of light  
The speed of life is quickly passing by  
I'm here to remain

Flying at the speed of light  
The speed of life is quickly passing by  
Still it's all the same  
Flying at the speed of light  
The speed of life is quickly passing by

I'm here to remain

End what was there, what has been  
Break the silence  
Tell me about what you hold inside  
See what is here, what will be  
Be inspired  
Take off to fly to a better life

At the speed of light I fly  
I'm one step away  
Seconds turn days into nights  
And I'm on my way  
At the speed of light I fly  
Aeons passing by  
All believers still alive  
At speed of light they fly
